## Education

### Post-secondary vocational certificate / Backend Software Development

IEK ΔΕΛΤΑ 360  
10/2024 – 06/2026 | Thessalonikh, Greece

- **Year 1 of 2** in the *Backend Software Development* program at **IEK ΔΕΛΤΑ 360** (Thessaloniki).
- **Curriculum & languages:** **Kotlin** (focus) · **C/C++, C#, Java, PHP, Python, JavaScript** · Web: **HTML/CSS** · Databases: **MySQL** · Foundations: **OOP**, data structures, **SQL/REST**.
- **Tooling & practice:** **Git/GitHub**, IntelliJ IDEA / Android Studio / VS Code, Gradle; hands-on projects turning coursework into working apps.

## Skills

Kotlin	●●●●●●
Java	●●●●●
C++	●●●●●
C#	●●●●●
Flutter	●●●●●
Swift	●●●●●

## Languages

Greek	██████████
English	██████████

## About Me

I'm an **entry-level software developer** who turns messy, real-world workflows into simple tools people actually use. I recently built a small pharmacy platform: a **desktop app** for owners/crew to manage inventory (with a built-in **Smart Security Camera** for face-based check-ins), a lightweight service that keeps stock accurate and publishes a **safe public snapshot**, and a **citizen Android app** with a **map** showing **on-duty pharmacies** and **live item counts**. The inventory system supports **USB-scanner flows for arrivals and sales**, so updates are fast and reliable at the counter. I'm also co-building **Context Nexus**, an in-editor AI co-pilot for Unreal that gives large language models the **right, targeted context** by understanding C++ and Blueprints inside the editor. I care about clear UX, privacy by design, and documentation that makes demos effortless.
